[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL PROFILE

Software developer who enjoys turning ideas into clean, functional web and mobile applications. Experienced through hands-on projects across frontend, backend services, and mobile development using SvelteKit, JavaScript, Vue.js, Flutter, and Firebase. Focused on responsive interfaces, practical user experiences, reliable backend integration, problem solving, and continuous learning.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, Vue.js, Svelte, SvelteKit, Tailwind CSS, Bootstrap, Sass
Mobile	Flutter, Dart
Backend / Services	Firebase Authentication, Cloud Firestore, Firebase Storage, Firebase, real-time application features
Tools	Git, GitHub, Node.js, npm, VS Code

DEVELOPMENT EXPERIENCE

Software Development Journey

[Techpace](#) • December 2024 – Present

Started learning software development with Techpace, building a foundation in programming, software development concepts, and problem-solving. This foundation introduced web development and supported continued independent project building.

Web Development

[Independent Projects](#) • Present

Build modern web applications using JavaScript, Vue.js, Svelte, and SvelteKit. Work with Firebase for authentication, databases, storage, and real-time application features while focusing on clean interfaces and practical user experiences.

Mobile Development

[Independent Projects](#) • Present

Expanded into mobile development with Flutter, building responsive mobile interfaces and exploring application architecture, navigation, reusable components, and backend integration.

SELECTED PROJECTS

Zingram — Real-Time Messaging Application

[SvelteKit](#), [JavaScript](#), [Firebase](#)

- Built a real-time messaging application focused on simple, fast, and seamless communication.
- Implemented user authentication and account registration using Firebase Authentication.
- Built user profiles with customizable information, profile images, and social links.
- Implemented real-time message delivery using Firebase Firestore.
- Built username-based user search and support for different message types.
- Developed responsive UI patterns and a mobile-friendly, app-like experience.

Jeff Notes — Note-Keeping Application

[Modern web development stack](#) | [Live project](#)

- Built a clean and intuitive note-keeping application for creating and managing personal notes.
- Implemented a responsive interface for creating, viewing, editing, organizing, and finding saved notes.
- Focused on a minimal, distraction-free design and maintainable interface structure.

Crypto Ticker — Cryptocurrency Rate Tracker

[Flutter](#)

- Built a Flutter mobile application for checking cryptocurrency exchange rates.
- Integrated cryptocurrency market data and API-based data retrieval.
- Displayed cryptocurrency values against supported fiat currencies for quick rate comparison.
- Used reusable Flutter widgets and a clean, responsive mobile-first interface.

Jeff Contacts — Contact Management Web App

[Web development stack](#) | [Live project](#)

- Built a contact management web application for saving and managing personal contacts.
- Added calling, direct chat, and WhatsApp actions for saved contacts.
- Designed a clean, organized, responsive interface for everyday contact management.

Invoice Studio — Invoice Creation & Export

[Web development stack](#) | [Live project](#)

- Built a web application for creating and managing professional invoices.
- Implemented customizable business, customer, item, payment, quantity, price, and total fields.
- Added live invoice preview, automatic calculations, and print functionality.
- Designed a clean responsive interface for quick and simple invoice creation.

Personal Developer Portfolio — Developer Portfolio

[SvelteKit](#), [Tailwind CSS](#) | [Live project](#)

- Built a personal developer portfolio to showcase skills, projects, experience, education, and development journey.
- Created responsive sections for projects, skills, experience, education, and contact information.
- Added links to GitHub, LinkedIn, email, and other professional resources.

EDUCATION

Secondary School Education

[DomDomingos College](#) — Warri, Delta State, Nigeria • 2018 – 2024

Completed secondary school education with a focus on Mathematics, English, Chemistry, Physics, Biology, and Geography. Developed an early understanding of computer science fundamentals that sparked an interest in technology and software development.

LEARNING & DEVELOPMENT

Software Development — Techpace

[December 2024 – Present](#)

Started my programming journey with Techpace, where I built my foundation in software development and learned how to approach programming and problem-solving. Alongside structured learning and guidance, I continue to research, practice, and build projects independently to deepen my understanding.

CORE STRENGTHS

- | | |
|--|---|
| • Hands-on project-based learning | • Independent research and continuous learning |
| • Frontend development | • Web application development |
| • Mobile application development | • Firebase integration |
| • Responsive UI development | • Problem solving |
| • Clean and practical interface design | • Full-stack application development fundamentals |
